

SA-SAMS: What is new on 22.0.2

Back ground

The South African School Administration and Management System (SA-SAMS), is designed for the South African Education Sector and is maintained by the Department of Basic Education (DBE) as mandated. The application aims to assist schools with their own data administration and reporting by reducing recapturing and saving time and resources. SA-SAMS is also policy driven standardising policy implementation and reporting across all provinces and is a source of data that assist with monitoring and support. As per all departmental applications it is supplied to schools free of charge.

Currently data from SA-SAMS is used for Gr 12 NCS registration, reporting to Treasury to inform on the Provincial equitable share from the National Budget and many more and require therefor strict data validation rules built on the system that are aligned to the POPIA.

Development and release business processes :

SA-SAMS as a national application follows strict governance processes with its updated releases.

- It is updated quarterly with requests received from users and various policy owners. Changes are only included after being tabled at the National EMIS Technical Committee with membership from all EMIS provinces for recommendation.
- **The new version is only released after being tested by 8 Provincial EMIS sections as well as the relevant policy owners (e.g. Subject Specialists, Exams etc) as this has an effect on SBA marks supplied to NCS at the end of the year.**
- The changes and implementation are also audited by Internal Audit Services and annually by the Auditor-General of South Africa (AGSA) as part of the audits of national systems.

Version 22.0.1 and 22.0.2:

- Version 20.0.1 contained a correction to assist schools with DDD Valistractor uploads as well as other urgent updates. Unfortunately, the correction in 22.0.1 included a section that replaced the subject keys that affected e.g. the Time Table. The Error fix tool was developed to enable DDD Valistractor as well as the Time table and is included in 22.0.2 to ensure that all databases are corrected.
- To limit the number of patches, the new changes of 22.0.1 are included in version 22.0.2 with the correction of the subject key table. The result is that schools updated with 22.0.1 can upgrade to 22.0.2 that corrected the subject keys. Schools on 22.0.0 can upgrade directly to 22.0.2 will have all the changes of 22.0.1 without the error.

Changes on Release 22.0.2 & what schools must do:

** 22.0.1 changes that is included in 22.0.2

Description	Screen	What is new / changed	Action by the school
